Partners such as; IBM, Oracle, Microsoft, Sage Software, Psion, HP, Intermec, Zebra, O'Neil, Borland and Compuware.

Offices in USA

San Jose, CA and Austin, Tx
Mexico
Monterrey, NL and Mexico City

Food distribution and logistics companies require accurate and timely information on the cost of doing business to control expenses, comply with government regulations on product traceability and ultimately, grow their revenues. Once thought of as a competitive differentiator, the ability to efficiently manage the storage and retrieval of information is now a business requirement.

A Recall capability is mandatory for food industry companies, to have all the information for a complete trace of your products, process and raw materials could imply millions of dollars and company reputation impact.

Kernel customers have experienced tremendous benefits including reducing product losses by more than 68 % and increasing sales capacity by more than 21 % without adding additional infrastructure.

We serve and support food producers and distributors throughout the world. Our customers include leading companies such as Coca-Cola, Sigma Foods, PepsiCo, Qualtia Alimentos, Cemex, Frito Lay, and Femsa Logistics.
